Description

Gunnebo SpeedStile FL Series Flap Leaf Door Pedestrian Speed Gate for Internal Installation

Features

- Flap Leaf Door Pedestrian Speed Gate for Internal Installation
- Transparent design with high customisation potential
- Small footprint
- Advanced user safety system

Mode of Operation

- Normally Closed: Passage in one or both directions is electronically controlled. On receiving a signal from the access control system, or remote control, the flap leaves open. If an unauthorised person tries to tailgate or attempts to enter from the opposite direction, the in-built alarm system is activated. If within the pre-set timeout no passage has occurred, the lane will close and reset
- Normally Open: Provides an open walkway in rest position and will only close at unauthorised entry or tailgating attempts

Tailgate Detection

Wrong Way Detection
