Description

Tedee Smart Lock System

Features

- Discard traditional keys, sharing 'digital keys' and decide who has access and when
- Set digital keys to be active from a future time / date and to automatically deactivate
- Lock & unlock the door with a button or click on the app on your smartphone
- Connects to Tedee bridge for remote management and integration with smart home systems
- Battery powered mechanism mounted on the inside of the door
- Requires a dedicated cylinder or adaptor for your lock type
- Battery life of up to 14 months, when used up to 8 times per day
- Available in White / Silver and graphite colourways

Technical Characteristics

- Suitable for inward opening doors
- Incompatible with outward opening doors if the distance between the cylinder axis and the door frame is less than 4cm
- Requires Euro profile cylinder with emergency function and special adaptor
- The lock is equipped with a non-replaceable LiPo 3000mAh battery. It can be recharged using a micro USB cable connected to a power source

Tedee Business Portal

- Desktop browser interface for system management
- Grant and revoke access: Easy on and off boarding
- Manage multiple doors: Connect all smart locks to control hub
- Monitor activity logs: Check who and when each lock has been used
- Check status: See updates and battery levels of your devices
